INDEX (TOM. XXI-XXII)

ANANDANI P. and SRIVASTAVA H. S. P. On Mellin transform of product involving Fox's H -function and a generalized function of two variables.....XXI-2,	35
BASH David W. The sum of normal functions and very normal functions.....XXI-2,	1
BENABDALLAH Khalid and IRWIN John. N -high subgroups and P -adic topology.....XXI-2,	43
BHATNAGAR P. L. Lommel type integrals involving products of three Bessel functions.....XXII-1,	1
HIRAI Takaharu. Total undecidability on the class of general recursive function with a given property.....XXII-1,	43
HIRÔSE Ken and OYA Makono. General theory of flow-chartsXXI-2,	55
ISHIDA Kenro. Some remarks on the recurrent sets for transient random walk.....XXI-2,	83
IWAMURA Tsurane, KAKEHI Katsuhiko, SAKUMA Koiti, SIMAUTI Takakazu, WADA Eiiti and YONEDA Nobuo. ALGOL N .XXI-1,	1
KUROKI Nobuaki. Note on purity of ideals on semigroups.XXII-1,	13
MOORE J. Douglas and BOWMAN Harold. A note on the large subgroup topology for Abelian groupsXXII-2,	7
MÔTÔHASHI Nobuyoshi. A faithful interpretation of intuitionistic predicate logic in classical predicate logic.....XXI-2,	11
NAKANO Takeo. A characterization of intervals; the consecutive (one's or retrieval) propertyXXII-1,	49
NAKANO Takeo. A remark on the consecutivity of incidence matrices.....XXII-1,	61
NAKANO Takeo and ENDO Mikihiro. Arithmetic in block designsXXII-2,	95
NAMBA Kanji. Independence proof of (ω, ω_1) -WDL from (ω, ω) -WDL.....XXI-2,	47
NAMBA Kanji. On the closed unbounded ideal of ordinal numbersXXII-2,	33
OHKUMA Tadashi. Finitary objects and ultrapowersXXI-2,	73
OKAZAKI Hiromitsu. Existence of a game of finite choice which is equivalent to a given game of countable choice.....XXII-1,	31
SHINODA Juichi. A note on Silver's extension.....XXII-2,	109
SRIVASTAVA H. M. Certain formulas involving Appell functionsXXI-1,	73
SRIVASTAVA H. M. Certain summation formulas involving generalized hypergeometric functionsXXI-2,	25
SRIVASTAVA H. M. and PANDA Rekha. Certain expansion formulas	

involving the generalized Lauricella functions.....	XXII-2,	19
TAKAHASI Ken-ichi. Analytic reduction of a system of differential equations to a normal form	XXII-2,	57
TANAKA Hisao. Length of analytic well-orderings	XXI-2,	7
YAMANAKA Takesi and PERSSON Jan. On an extension of Holmgren's uniqueness theorem	XXII-1,	19
YAMANAKA Takesi. A note on Holmgren's uniqueness theorem	XXII-2,	1
